## **POWERCOLOR INTRODUCES THE ENERGY EFFICIENT GO! GREEN SERIES**

*New product series wraps high performance graphics in a green package*

Taipei, Taiwan –July 20, 2009– TUL Corporation, a leading manufacturer of AMD graphics cards, announces a new series of products that is environmentally friendly and power efficient for the consumer. The PowerColor Go! Green series offers the HD4670, HD4650 and HD4350 Silent Cooling Solution (SCS), featuring stealth like silence and low power consumption, providing a cost efficient and silent gaming and entertainment solution.

The PowerColor Go! Green series consumes up to 38% less power than competing graphics cards and performs up to 36% better in benchmark tests. The products in the series offer an environmentally friendly solution to help consumers cut costs without compromising great performance for their home theater PC's and gaming rigs.

“The Go! Green series was designed with today’s consumers in mind,” says Ted Chen, TUL CEO. “The products in the Go! Green series are proven performers with the added benefit of low power consumption and silent cooling.”

As an added benefit, the Go! Green series is compatible with DirectX 10.1 and ATI Stream Technology. The feature allows AMD graphics processors to work with the CPU to accelerate applications beyond just graphics. Converting standard and HD video into multiple formats by parallel processing and transcoding files has never been faster or easier. For more information on DirectX 10.1 and ATI Stream, visit [www.amd.com](http://www.amd.com).

### **About TUL Corporation**

TUL is a leading supplier of AMD graphics cards under the PowerColor brand. We offer award-winning products based on our technology leading components, quality design and superb engineering. TUL employs more than 150 talents worldwide, with offices in China, Europe, Russia and USA to support over 300 channel partners and distributors in 50 plus countries.
